

Position Notice: CERSA Intern

The position will report directly to the MuF Director of Operations. This position will be an integral part of the MuF team supporting the information system and the preparation for the Global Minor Use Summit in late 2023.

The [**Minor Use Foundation, Inc. \(MUF\)**](#) is a nonprofit organization incorporated in the State of New Jersey. MuF conducts research and policy projects to facilitate the safe registration of pesticides for minor use crops (fruits, vegetables, nuts, and spices) globally. The Foundation is committed to promoting economic growth, environmental sustainability, and facilitating the trade of nutritious crops. The mission of the Foundation includes the following:

- Facilitate global priority setting for pesticide research for minor uses
- Coordinate residue studies and existing data in order to obtain CODEX MRLs and maximize the impact of resources
- Enhance regulatory and research capacity in developing countries and ensure pesticides are used safely around the world
- Support regional regulatory expert working groups and collaborate to address issues of regional importance

This internship is an excellent opportunity to learn about how agricultural development projects are implemented on the ground in an international development context. The intern will learn the regulatory, logistical, and human resources complexities of conducting international agricultural research projects. It is also an excellent opportunity to learn about how international institutions and organizations collaborate to achieve the best outcomes for specialty crop growers in developing countries.

Duties of this position include, but are not limited to:

Operational support to MuF (40%)

- Participate in international team meetings where we will develop project plans, resolve barriers to implementation, and brainstorm solutions. Assemble data and project plans, track follow-ups and deliverables, and conduct outreach to stakeholders on behalf of the MuF. Support international consultants in the execution of their training and capacity-building programs.

Support Foundation staff organizing and planning the global minor use summit to be held in late 2023 (40%)

- Prepare and plan communication for to solicit publicity, attendees, and sponsor. Organize and reach out to potential attendees. Facilitate promoting, registering, logistics for the Summit including communications with donors, sponsors, and participants.

Assist in the implementation of the MuF Communications strategy (30%)

- Support the MuF as it expands its reach and network by developing infographics, pamphlets, and informational material about the Foundation. Manage the Foundation's social media presence.

Qualifications, Desired Skills, Characteristics, and Competencies

- Progress toward earned degree (science, agriculture, or related field).

- Experience and understanding of agricultural science, technology, product development and relevant technical disciplines.
- A keen interest and ability in communicating scientific information and ability to work harmoniously and effectively with a wide range of people and organizations.
- Strong language skills and bilingual in Spanish or French and English preferred.
- International experience is an advantage
- Organization, social media/web design, communication experience would be advantageous

Compensation

This is a remote position and a successful candidate will be selected and compensated by CERSA.
